

Agenda

- **Previous year in the Danish Datamanagement SIG.**
 - **Issues, Change Requests and Trouble Reports.**
 - **The future with ProjectWise Document Management.**
 - **A word from Bentley.**
-
- **On behalf of all the ProjectWise SIG users in Denmark, we thank you for taking the time to meet with us.**

Christian J. Jakobsen, COWI A/S, Vice Officer from the Danish Datamanagement SIG

Previous year in the Danish Datamanagement SIG.

- Annual user conference in November 2012 in Vejle.
 - Transmittals.
 - First time with AutoCAD sessions, great.
- SDK development is evolving.
 - More are developing utilities.
 - We still need courses.
- DGN Formats?
 - DGN → PDF → iModels → Optimized iModels. What next?
- PW SS4 Refresh release.
 - Enable/Disable integration.
 - AutoCAD 2013 and better Revit support. What about 2014?
 - Great with the long waited Rules Engine.

Issues, change requests, trouble reports, etc. (CRs and TRs)

Some important issues from the DK SIG.

- Change icons /colors on Project folders and Standard folders
 - In order to for example distinguish folders for Approval from other folders.
- Check references when "Importing" documents.
 - Models imported as well.
- Managing Layouts inside DWG files.(DGN-files).
 - Multi Document Registration.
- User rights per application.
 - For example adding applications to Groups. (Edit Word/ReadOnly CAD)
- Passport policy..
 - Buy and manage concurrent license pools.
 - Locking Passports for one year is a strain on ProjectWise licenses.

Issues, change requests, trouble reports, etc. (CRs and TRs)

- Improved GUI in ProjectWise Explorer.
 - Too large Right click menu.
 - Small tweaks. For example Ok on check in optional.
- GPS coordinates.
 - Attach GPS coordinates to documents.
 - Spatial Management with GPS?
- AssetWise or ProjectWise?
 - Can they coexist (Export/Import)?
 - When to prefer the one from the other?
 - ProjectWise would "feed" AssetWise?
- Search for Users in User in Admin Users/Groups.
- Where was document originally created?
 - Document Tracking.

Issues, change requests, trouble reports, etc. (CRs and TRs)

- Internal Shortcuts in folders to documents and other folders. (CR#351765)
 - Not Custom Folders.
- Purge Local Copies on other clients from Document Organizer. (CR#351730)
- Admin Document Process File Type assoc. (CR#311653)
 - Reverse selection (All But).
- Better Reference Control..
 - Check of Drawing references opposed to ProjectWise references.
 - Give warnings.
 - Add more warning when references are not controlled by ProjectWise.
 - Are you aware that ...?
- ProjectWise External Shortcuts not compatible between SS3 and SS4?

The future with **ProjectWise Document management**.

- Document Import and Export.
 - Getting much better but lacks functionality.
 - Reference repath in file system.
 - Export more than one Environment.
 - Ready to Import all references.
- Support of applications.
 - Adding a generic Save/Open/SaveAs to more applications.
- Passport policy.
 - Why one year?.
 - Concurrent licensing?
- Does a large number of Environments slow down ProjectWise?
- Export and Import Attribute Exchange Rules.

A word from Bentley.

- Any general Pointers to where ProjectWise is going in the future.

The **Bentley LEARN**ing Conference 2013.

Thanks.

Again thank you for taking the time to meet with us.

Our Danish conference 5th and 6th November in Vejle Denmark.

The DK Document Management SIG will keep working.
