

# Enhance Collaboration and Consumption of Reality Data with Cloud Services

ContextCapture

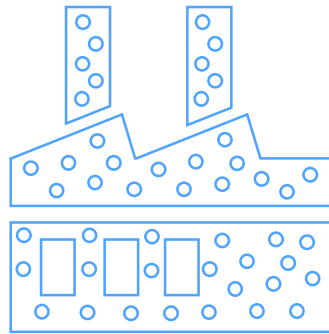

## Connecting Reality and “Virtuality”

# What is reality data?

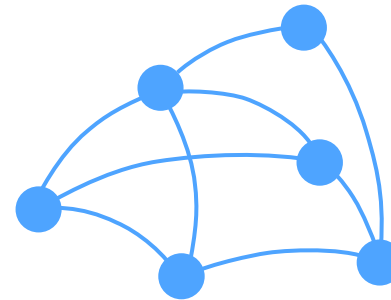

- Data that provides digital context for all phases of an asset lifecycle.

Performance needs

# Managing reality data

- Geographically dispersed project teams require easily accessible data that is readily available to all team members.

# Sensitive – who can access?

# Sensitive – MUST stay in the country?

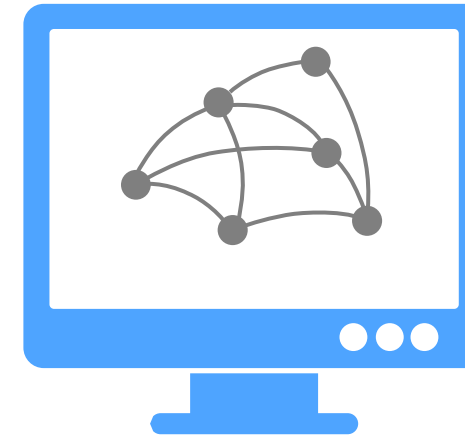

## Legal

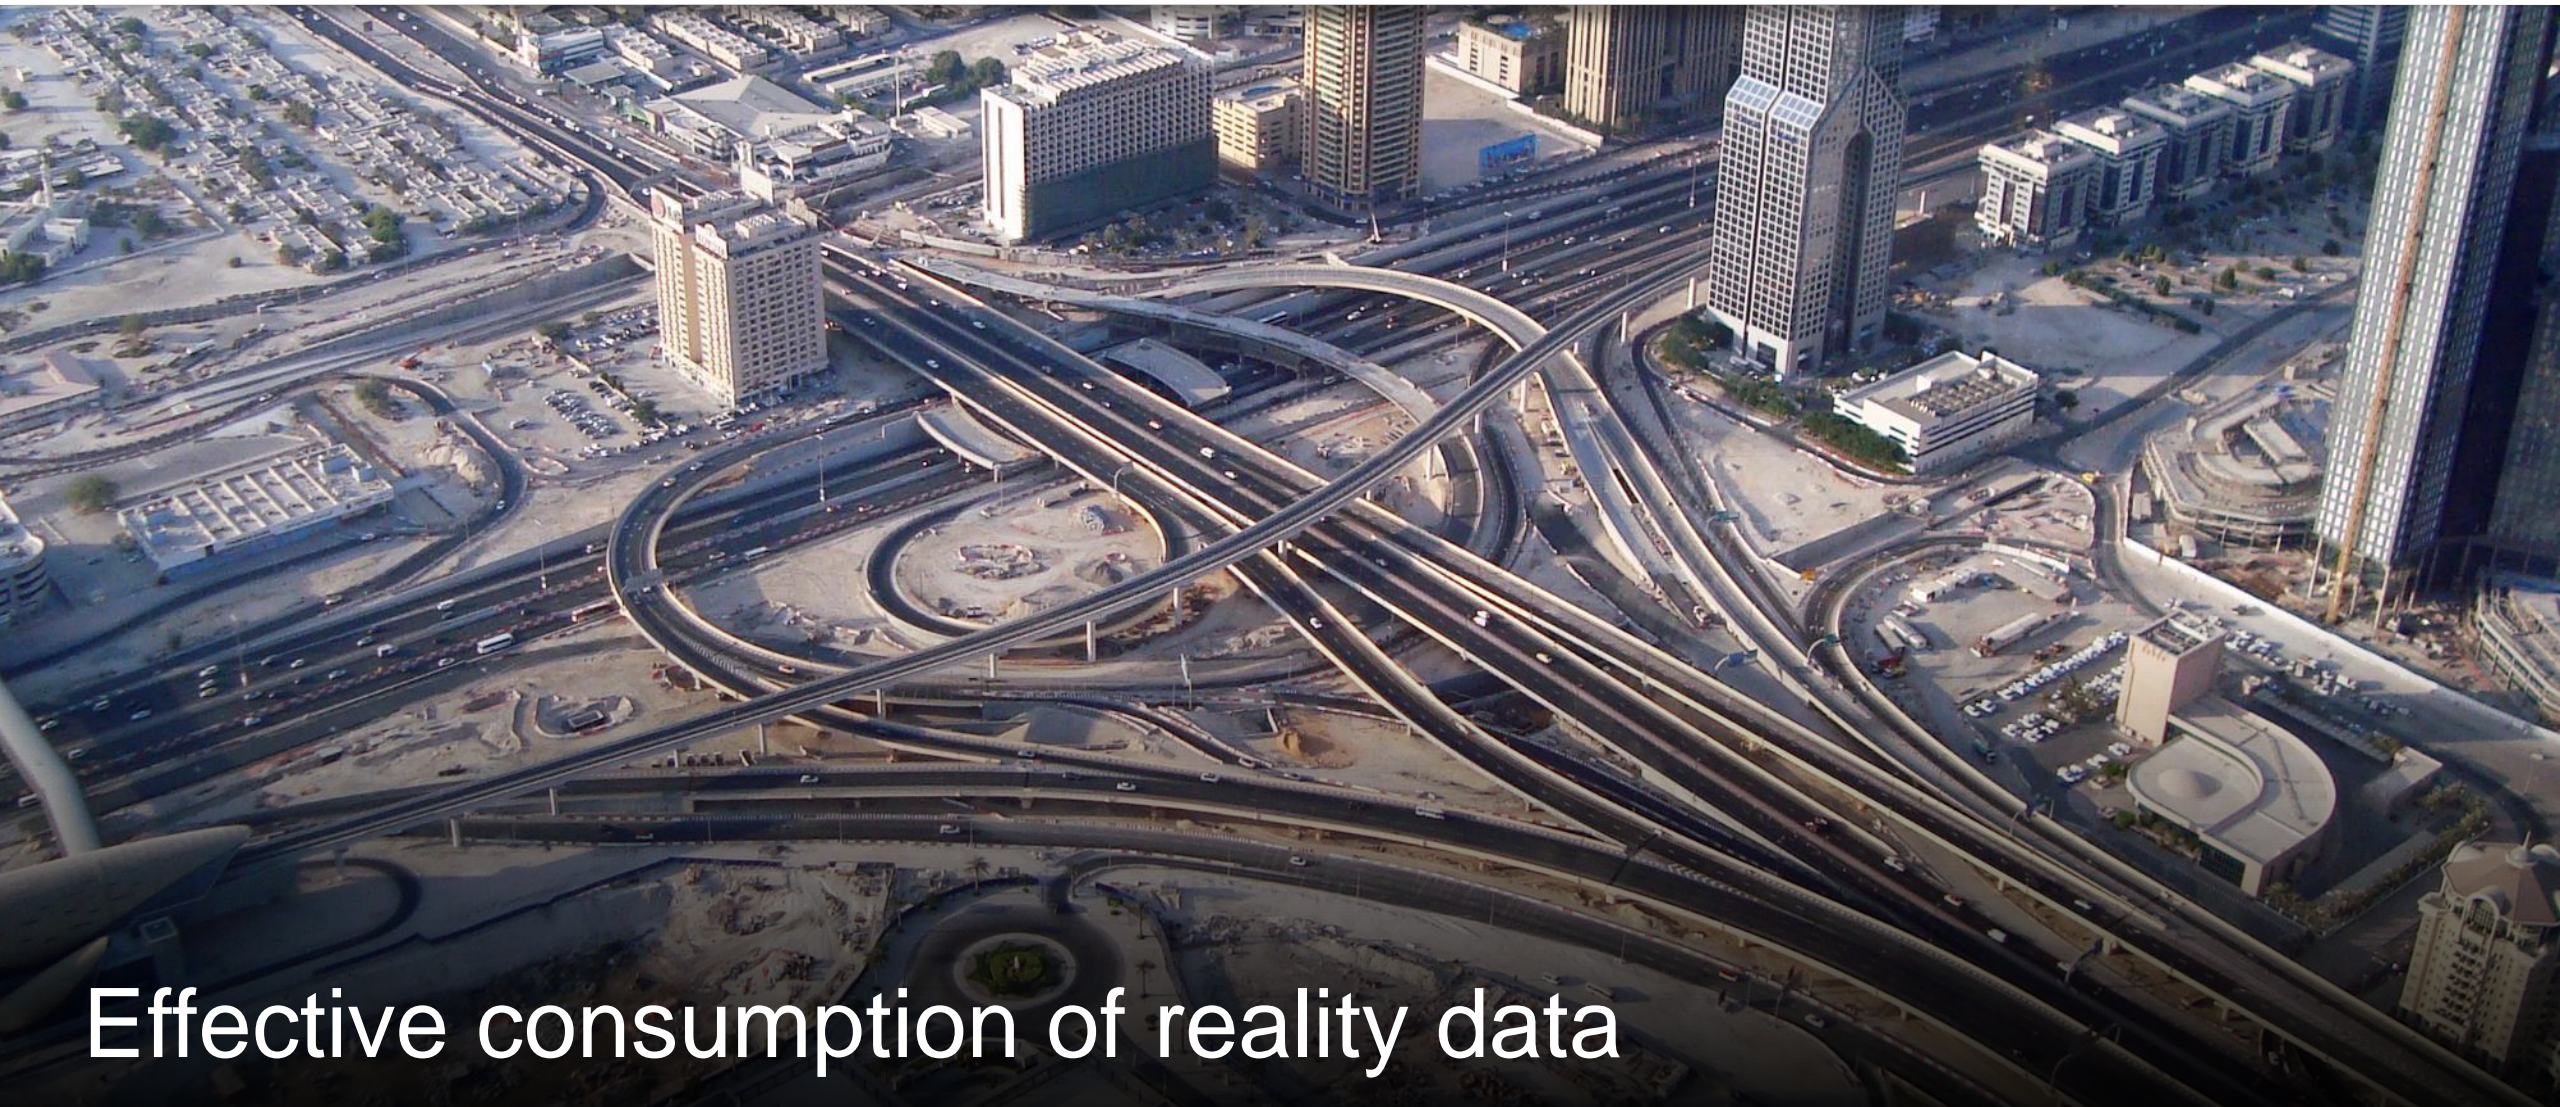

# Getting the most value out of reality data

- Touching more people

- Enable team collaboration and information sharing
- Analysis and compatibility with users' existing workflows

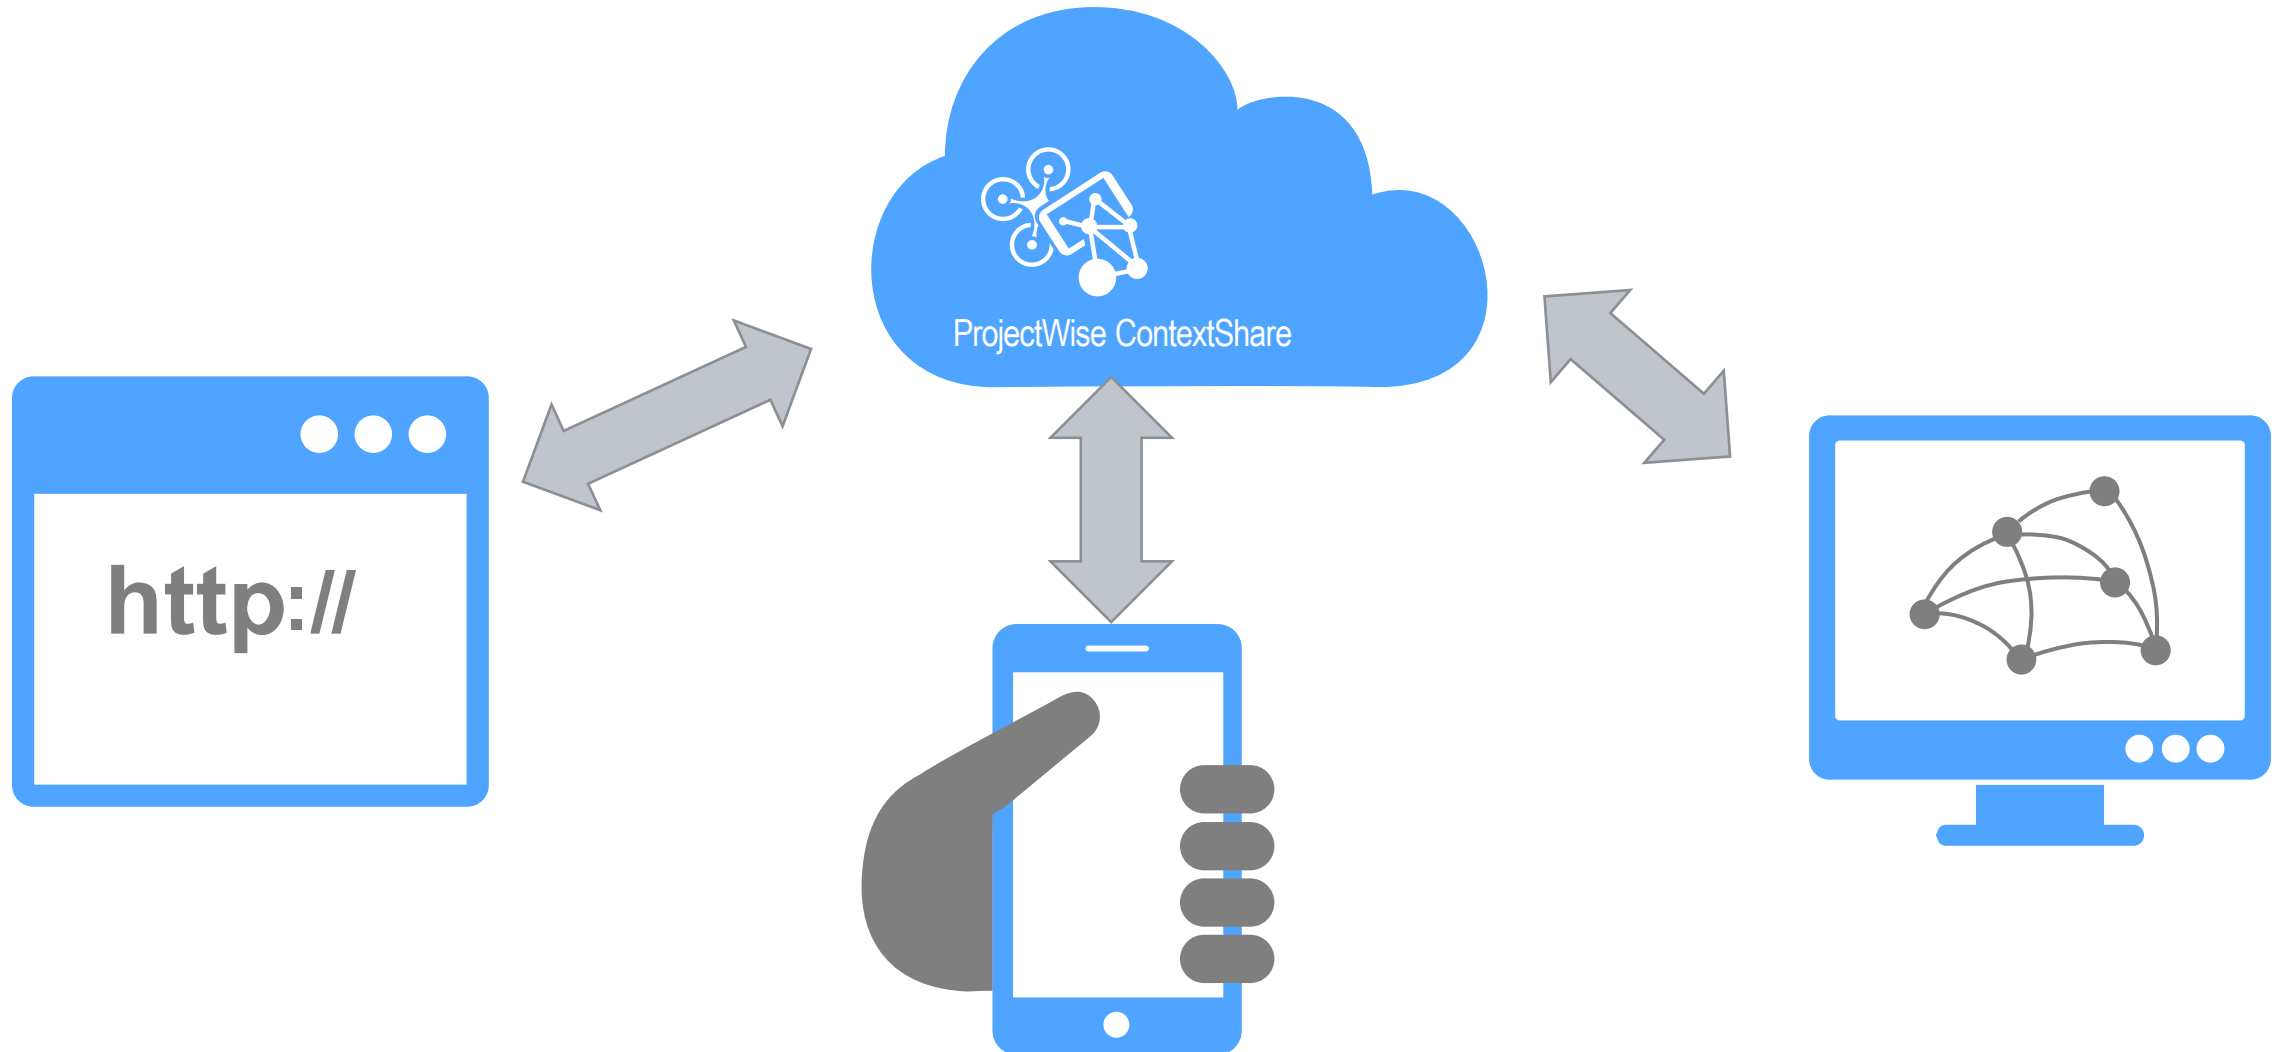

# Effective consumption of reality data

Using on-premises & cloud services

# Manage and consume reality data with iTwin Services

# What is ProjectWise ContextShare?

- A cloud-based solution that enables organizations to manage large quantities of reality data including reality meshes, point clouds, orthophotos and terrains.

Securely manage and  
control access to your  
reality data

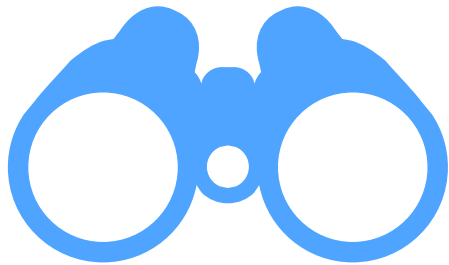

Share your reality data  
with team members of  
ProjectWise projects

Easily search,  
download or stream  
your reality data

# What is Reality Data Web Viewer?

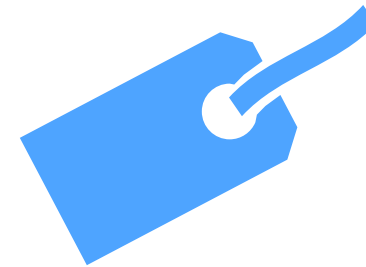

- A cloud based solution allowing users to visualize, navigate and annotate large reality meshes and terrains.

Visualize reality meshes and terrains in a web browser using desktop and mobile devices

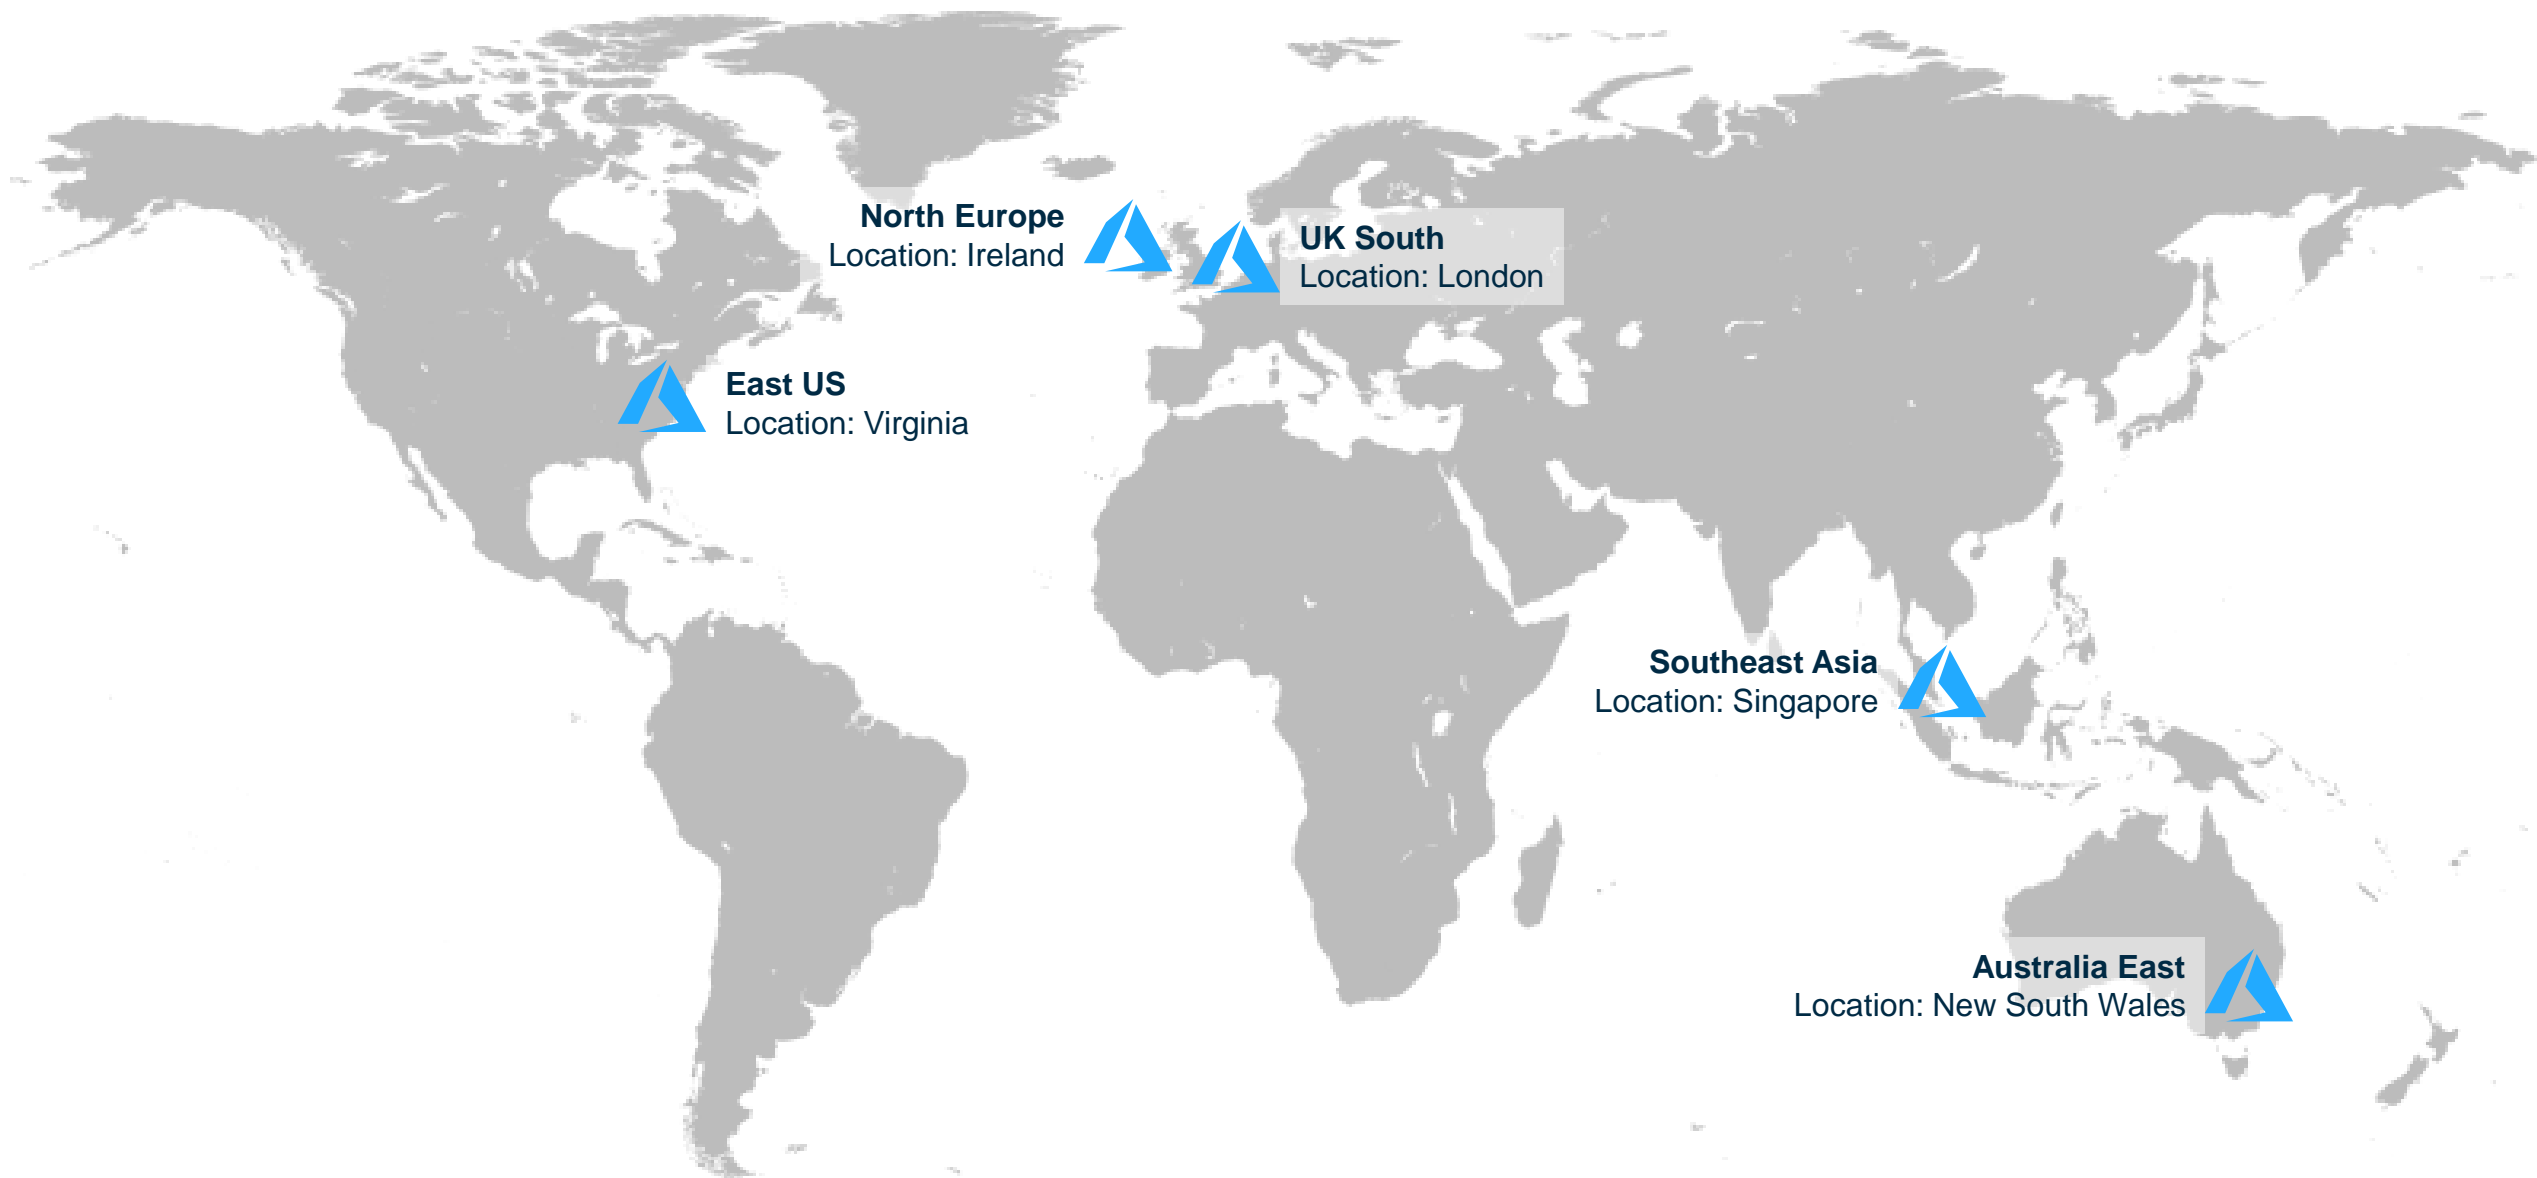

Use navigation tools to inspect and analyze reality meshes and terrains

Interactively link business and engineering data to reality meshes and terrains

# Supported datacenters

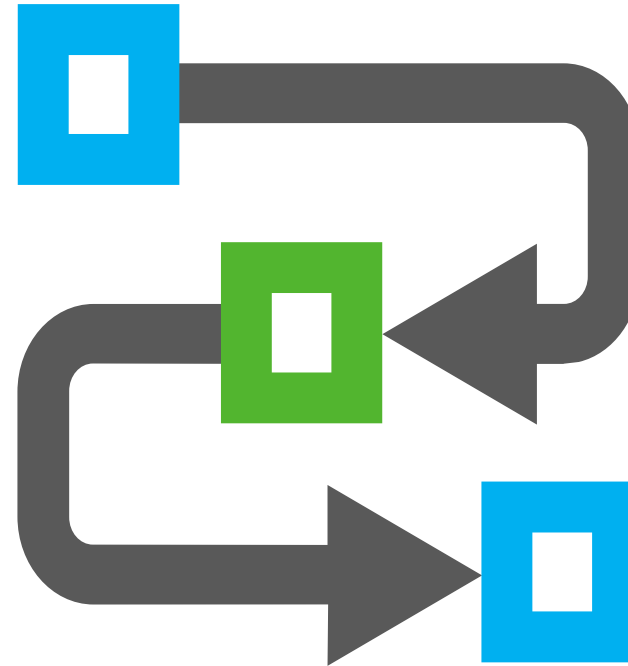

# Reality mesh streaming

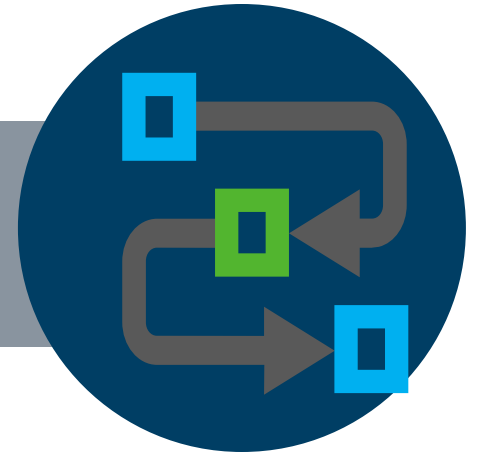

- Download:
  - Use different applications to download and consume a reality mesh
  - Latency between operations
- Streaming:
  - Attach reality mesh from MicroStation-based applications
  - Ready to work within seconds

File Size	Download duration @ 8 MB/s
1 GB	~2 minutes
5 GB	~10 minutes
10 GB	~20 minutes

# Some Workflows

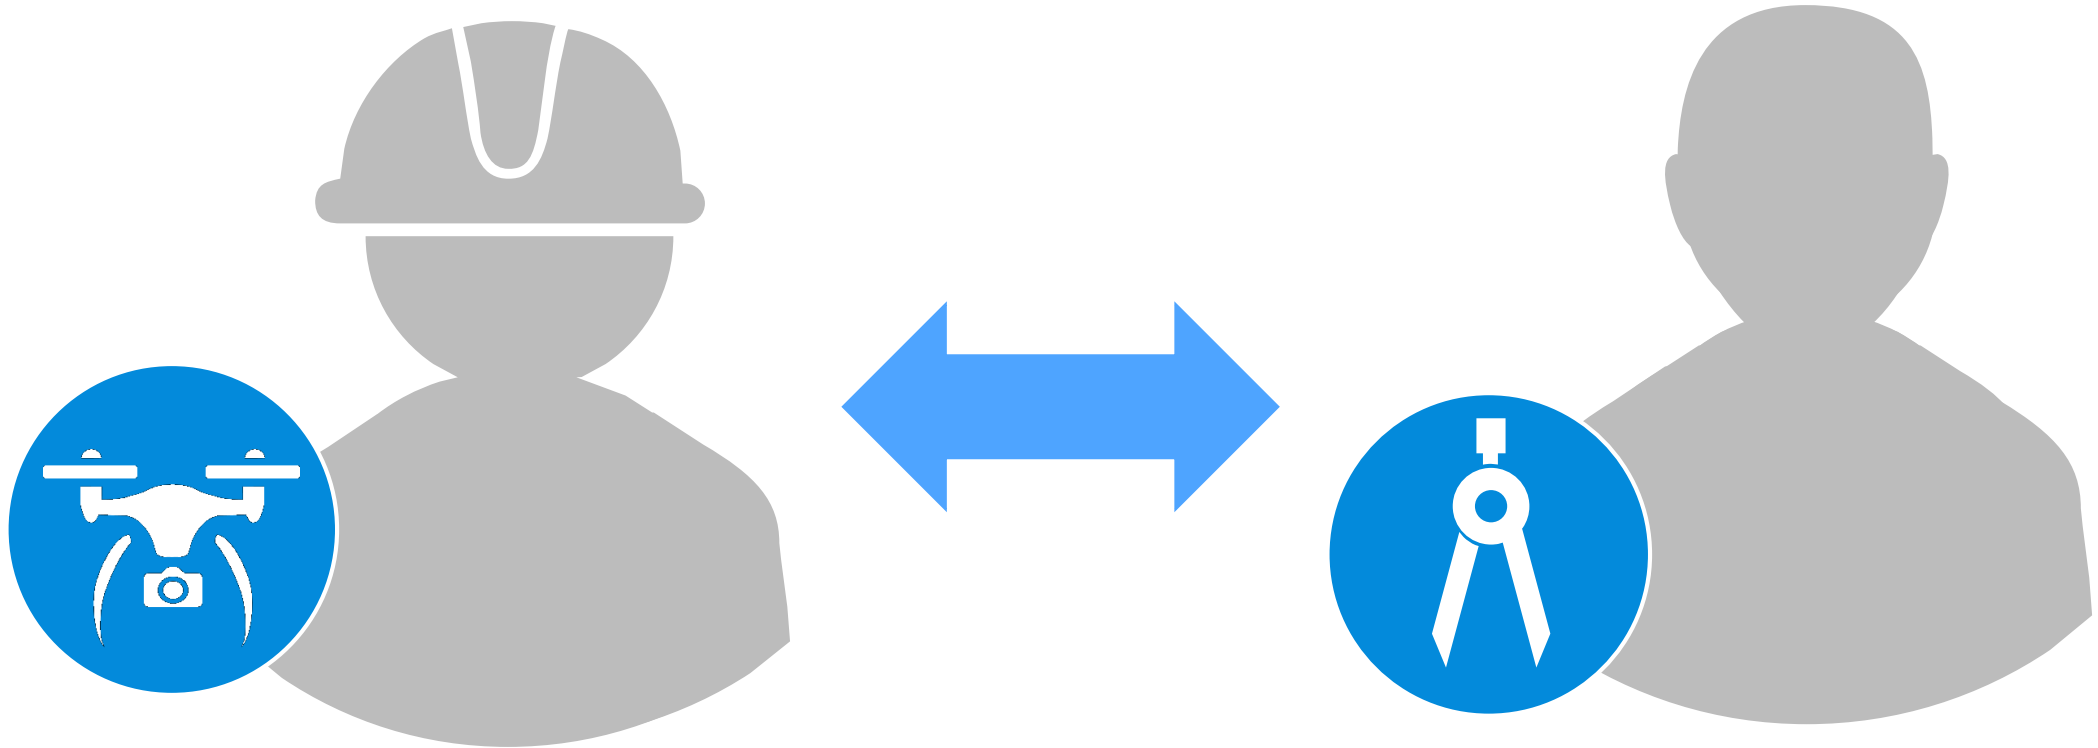

# Inspection by photogrammetry and reality model annotation

# Collaboration

# Generate high-fidelity 3D reality meshes
